To keep you body in good health.

We actively provide health guidance through medical checkups and health consultation so as to encourage the awareness of health among the residents. We also prepare such a system through which anyone could receive medical care at ease even in an emergency. We are working to provide meticulous medical services. Furthermore, the Ama Area Emergency Clinic is available even in emergency cases during the night hours of weekdays and weekends. We will develop more wide-area collaboration in the future and enhance the emergency medical systems.

We support healthy lives.

We realize how important health is when we fall ill even if we do not usually think about it. In an effort to prevent diseases, we provide thorough medical checkups and actively promote health guidance.
